Objectives

I'm seeking to apply my knowledge of hospitality, computing, and customer service.

Experience

Cashier, Tim Horton's

October 2012 to June 2012

I mainly handled cash while taking orders. I also prepared food and served it.

Banquets Porter and Bartender, Fantasyland Hotel

December 2012 to January 2017

I've learned a great deal about work ethics, the food industry, and customer service. I mentored and trained new employees as a porter and bartender. I also served and set up rooms for meetings, parties, and weddings.

Education

MacEwan, Computer Science

I finished my first year of university at MacEwan. I've learned and applied many aspects of programming to develop games and applications.

NAIT, Web Development

I'm further learning aspects of web development and web design. We are thought to be very user-friendly when adding new features to our sites. I currently hold a 3.0 GPA and plan to do a co-op term soon.

Communication

While working at Fantasyland Hotel, I grew my social skills while speaking to new guests every day. It was interesting as I've also learned a lot from the new people I met. I've taken a communication class and an organizational behavior class to comprehend the social facet of work.

Skills

- I'm experienced in the food industry.
- I am able to create, develop, and fix web pages and applications.
- I'm proficient in Microsoft Office and Google Docs.
